Attn: Birgit Leobacher
Re: Alumero clamp approval for MiaSolé modules

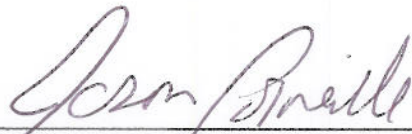

Alumero Systematic Solutions GmbH ("Alumero") has designed clamps ("Clamps") for use in attaching certain photovoltaic modules ("Modules") manufactured by MiaSolé ("Supplier") to racking. Supplier hereby agrees that the Clamps referenced by the name of Click L= 80 mm Version 7.3, Click L= 100 mm Version 7.3, and Securitas L= 70 mm Version 7.3 may be used with the Modules, subject to the proper installation, operation and maintenance of the Modules in accordance with Supplier's installation manual and operations and maintenance manuals (collectively, the "Manuals"); provided, however, that, notwithstanding anything contained in the Manuals to the contrary, the mounting position of each clamp upon the Modules shall be 360 millimeters from the center of the clamp to the Module edge, with a tolerance of ± 20 millimeters. These clamps can be used in applications requiring a static load of up to 5400 Pa on the front side of the module.

Alumero hereby acknowledges and agrees that (i) the foregoing is not intended to be a UL certification of the Modules with Alumero's Clamps, (ii) Supplier makes no additional warranties with respect to the Modules, and (iii) Alumero's sole warranty with respect to the Modules shall be limited to Supplier's standard warranty.

This letter agreement may be executed by the parties hereto in counterparts, each of which shall be deemed to be an original, but all such counterparts shall together constitute one and the same instrument.
